Technical Data Sheet DGS Lead-Free Wire Solder

DGS Lead-Free Solder is manufactured using only pure virgin metals. It has the narrowest melting range in the well-established tin/copper/silver alloy system. In addition to tin/copper and silver, two other proprietary additives give this product a low melting temperature range as well as excellent flow and wetting characteristics.

Let your imagination run wild with DGS!

- Excellent Flow Characteristics
- High luster Finish (same appearance as 60/40)
- Runs an Excellent Bead
- Easy to Use
- Environmentally Safe

Technical Data

- Temperature Range: 415 - 490° F
- Tensile Strength: 6600 psi
