Technical Data Sheet

Pewter-Finish Lead-Free Wire Solder

Pewter-Finish is manufactured using only pure virgin metals. This lead-free alloy contains tin, silver and copper and has excellent flow, beading and wetting characteristics. Free of zinc, arsenic, bismuth, cadmium and zinc.

100% safe for jewelry applications as well as any stained glass project where lead-free solder is recommended. It has the penetration, solderability and capillary action of 50/50. A unique solder that renders a lightweight yet strong product with a satin finish that resembles antique pewter.

Technical Data

- Melting Temperature: 418 - 440⁰ F
- Tensile Strength: 8,000 psi
