The Ultimate & Ultimate THIN Stained Glass Wire Solder

The Ultimate stained glass wire solder combines tin, lead and two other metals to produce the perfect solder. It goes from solid to liquid instantly with no pasty range. No wavy heat lines in your beads.

You can work faster than ever with this solder while running the finest most intricate bead. An excellent solder to use when teaching students how to solder.

Ultimate THIN (.062) was developed to make decorative soldering easy. You can create the tiniest dots and most intricate decorate seams to enhance all your stained glass projects.
